Patient

- The baby is under constant supervision
- The child is in reach of the mother

Staff

- Simple handling and hygiene
- Practical height and tilt adjustment

Management

- State-of-the-art equipment for maternity units
- Colour concept

MiMi cot

The MiMi cot for newborns provides children with complete safety and ensures effective care. It is highly practical and makes it easier for medical staff and mothers to care for newborns.

PRACTICAL IN ALL ITS ASPECTS

- The cot is mobile and very easy to handle, therefore it is not a problem, for example, to move the baby between the room and the examination room.
- It is simple to position the height of the cot. This applies to the examination position or placing the cot directly above the mother's bed.

1

The cot, tub and mattress are easy to wash and clean. The mattress has a waterproof cover.

2

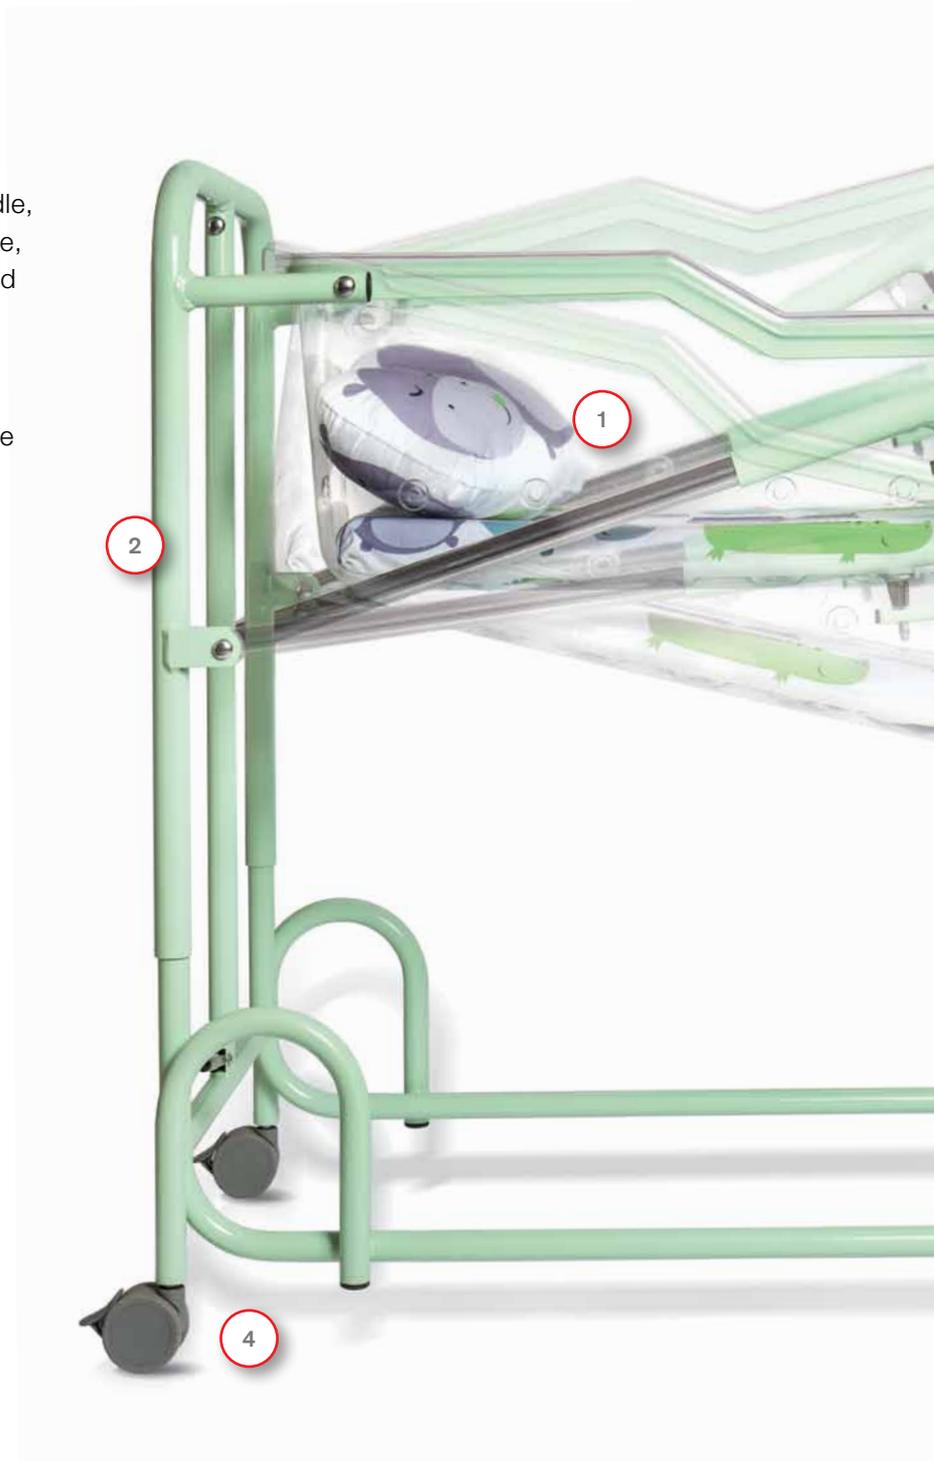

The height of the cot is adjusted using a gas spring mechanism.

3

Manual tilt of the cot into the TR/ATR position.

4

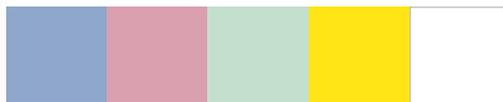

Castors with brakes for safe locking of the cot.

100% SAFE

- The adjustable tilt is important for children who need to be in a higher position if their respiratory tract is impaired due to illness.
- The cot is stable so there is no risk of being overturned.
- The transparent tub is made to measure for a newborn, making the child feel safer in a smaller space.
- The cot is compatible with commonly used respiratory monitors.

FOR HEALTH AND COMFORT

- The tub is made of transparent plastic, healthcare professionals and mothers have the baby in constant sight.
- The transparency and mobility of the cot allows the child to be exposed to sunlight in case of newborn jaundice.

COLOUR CONCEPT

The modern design and possibility of choice from several colour versions creates a pleasant environment in a department increasing the prestige of the entire facility.

Technical data

BASIC TECHNICAL PARAMETERS

External cot dimensions (l × w × h)	92 × 57 × 102 cm
Tub dimensions (l × w × h)	79.5 × 46.5 × 22–29 cm
Height adjustment of the mattress platform using gas springs	64 to 94 cm
Tub tilt angle	+14° / –14°
Cot weight	21 kg
Safe working load	up to a 15 kg child
