Functional elegance in nursing care

Bedside Cabinets

Nursing care

Bedside cabinets and serving trays

For sick people in need of nursing care, it is important to have their own private space just for themselves - to store personal belongings and have essential things close at hand. wissner-bosserhoff's bedside cabinets reliably satisfy this need. Furthermore, they support the patients and the nursing staff in numerous activities, such as eating or reading. The easy access from the bed helps with effective fall prevention. wissner-bosserhoff bedside cabinets are a well-matched complement for nursing home beds, and fulfill highest demands in optical and functional design.

Your advantages

Functionality and design at a glance

The wissner-bosserhoff stylo bedside cabinet series combines a homely design with innovative functions and therefore it is possible to manufacture practice-oriented product versions. Thanks to a unique mechanism, the serving tray can be easily mounted on both sides of the bedside cabinet without tools – a flexible and economic solution.

The expert standard "Fall Prophylaxis", which is well-established in Germany, has set itself the target of preventing falls and their consequences by recognizing risks and hazards, and eliminating them as far as possible. By using drawers instead of doors in all of our bedside cabinet models, we have made a valuable contribution to reducing the risk of falling. The access from the bed is easier, which minimizes the risk of falling. Special models also offer an optimal access to the bedside cabinet for low nursing beds. The drawers are easy to clean as they can be removed without tools.

The soft closing drawers are a standard feature¹⁾ that minimize noise and the danger of entrapment.

The 5th castor, which is attached to the mechanism, and the compact design ensure an exceptional stability and load bearing capacity of up to 20 kg of the over-bed tabletop.

The overbed table is attached to the side and can be easily swung out with one hand, so that the nurse does not have to put the eating tray down.

The aluminum handles²⁾ give the vivo and vitalia bedside cabinet series their unique design and enable ergonomic access from the bed.

The models with refrigerator have a spacious capacity of 41 l and are suitable for large bottles.

The pull-out tray can be safely locked into place when it is pulled out. It is impossible to unintentionally push the pull-out tray in.

The design is closed on three sides²⁾, so it is impossible to push the drawers through to the wall.

Top plate with rounded edges

Locking mechanism of the pulled-out tray

Adapter to easily change the side of the overbed table top without tools (left/right)

Aluminum handles²⁾: Design feature and guarantee for ergonomic handling

Additional comfort for patients and staff with soft closing drawers¹⁾

Thanks to the adapter attached on both sides, the overbed table mechanism can be switched from one bedside cabinet to the other, which is an economical solution for the user.

The vivo series

Design meets functionality

The vivo bedside cabinet series create a cozy and harmonic atmosphere. The rounded top board and the elegant rounded profiles add to the elegant and modern appearance. Low bedside cabinets, integrated overbed table mechanisms, optional pull-out trays and models with a refrigerator leave nothing to be desired.

The vitalia series

Robust design with clear lines

The vitalia bedside cabinet series stands out due to its decorative details, such as the rounded top board, the high-quality, wide side panel and ergonomically shaped aluminum handles. As an option, the bedside cabinets can be equipped with full-length handles, which make access to the drawers even easier for the resident.

The vt series

A tried and tested classic

The vt bedside cabinet series is the budget-friendly basic model in the portfolio of wissner-bosserhoff bedside cabinets. The tired-and-tested details of the vt models are quite impressive. Stable steel frames, high-quality ABS edges on all components of the bedside cabinet, as well as the rounded top board give the bedside cabinet its unmistakable character.

Serving tray

Flexible mobility

The serving tray is highly mobile, making it a practical aid in daily nursing care. It can be pushed up to the bedside cabinet, the bed or armchair, transport chair and wheelchair as needed. It is mainly used as a table replacement. The practical one-handed handling also is a very convincing feature.

stylo s3

The overbed table is height-adjustable and tiltable. It can be flexibly adjusted for different uses such as eating or to provide an ergonomic reading support.

stylo s3-t

The patients benefit from a second additional storage surface that is fixed. This way, for example, the resident can read and have coffee at the same time.

stylo s4

The larger overbed table also increases the comfort for patients who cannot leave the bed. Thanks to the fixed over-bed tabletop, the s4 serving tray is exceptionally stable..

stylo s4-t

The lateral tilting function is a comfortable reading or eating support for the resident. Drinks can be put down on a fixed shelf space while the over-bed tabletop is tilted.

The stylo series

Compliance with the highest hygiene standards

The stylo bedside cabinet series combines a cozy furniture design with innovative functions. Selected surface materials enable easy and thorough cleaning of the bedside cabinets and, therefore, even the highest hygienic standards are adhered to. Robust drawers with integrated bottle holders help to keep things tidy. Full-length handles guarantee easy access even from the bed. Higher product configurations offer more storage space (stylo 4) and the version with refrigerator (e.g. stylo 5-k) also has an additional middle compartment. You can find more information about the stylo series in a separate brochure.
