Improving and maintaining mobility

SafeLift | Revolutionary bed operation for residents

A key goal in in-patient care for the elderly is to maintain or improve mobility. More mobile residents are less prone to falling, further secondary diseases such as pressure ulcers are prevented, and their health is kept in optimum condition. This increases their self-esteem and an independent lifestyle is less restricted.

SafeLift offers the simplest operation so that residents can adjust their bed independently and set it to the best mobilization position for them. At the same time, they can support themselves when standing up on the SafeLift controller. This promotes residents' self-mobilization, reduces staff calls for bed adjustment and frees up care.

Simple bed operation
for residents

Standing-up and
mobilization aid

Cable- and battery-free
controller

Customized
for each resident

Simple bed operation & safe mobilization

SafeLift | Product benefits at a glance

01

SafeLift – intuitive simplicity

Added value for residents, care and care-home management

Resident

Mobilization and independence

- Accessible to residents when lying down, individually positionable and usable as a support
- Fall prevention – no tripping hazards from hanging cables
- Position of the SafeLift controller individually adjustable for each resident
- Suitable for right- and left-handed people, as well as people who get out of the right or left side of the bed
- Automatic night light makes it easier to get around in the dark

Nursing staff

Promotes relief & mobility in line with expert standards

- Promotes the mobility and independence of the resident
- For routine tasks, always ready to hand for care, too, care positions as usual by hand switch
- Automatic night light
- Simple and tool-free installation on every SafeFree® side guard
- Extremely easy to adjust to individual resident needs
- Relief on care staff thanks to reduced staff calls regarding bed adjustments

Management

Flexibility and economic efficiency

- Low follow-up costs – no fault-prone cables and no battery
- SafeLift controller can be attached without tools to any SafeFree® side guard
- Can be used on any bed
- Compatible with the SafeSense® Bed Exit Assistance System
- Can be retrofitted to all wissner-bosserhoff care beds with SafeFree® side guards*
